Captain J. J. Brereton of the Twen-

Another of the West Dip Properties In Pay Ore.

## SEVEN-FOOT BODY FOUND

ASSAYS MADE SHOW THIRTEEN. DOLLAR VALUES.

The Circle Company Incorporate On Lion Hill Ground-Sacking Gold Ore at the Dalton-Ore In the American—Down From Alta—The Sumpter Incorporates—On Curb.

The west dip of Camp Floyd district, which has "out so much ice" in mining circles during the past year, is able to report another rich strike, and one that promises to make that section more tamops in the future than ever before campps in the future than ever occurs as a producer of the yellow metal, and if these discoveries should be maintained for the next few months the production made by well-informed mining men to the effect that eventually the west dip will be the big end of camp Floyd district stands a good show of being verified.

The strike above referred to was made a day or two ago in the dray Rossov claim, embraced in the group of twenty calme owned by the Klamet Minins company and adjoining the La Cigale

company and adjoining the La Cigale mine on the north.

Thomas Weir and George A. Lowe are the principal owners of this property, and Mr. Weir states that the vein, which without doubt, is a continuation of the La Cigale, Omaha and Damy zone, was univovered at a depth of 119 feet, the cre body at this point being seven text in width, and, arouring to insays made at the La Cigale mill, carries gold values of 412 to the non, which is rich rock for milling mineral, as one can be treated at a profit by the cyanide process which ansays only 51 to the ton.

The work is the descriptions

which is rich rock for milling mineral, as one can be treated at a profit by the cyanide process which amongs only \$1 to the too.

The work in the development of the Ethinet has been done by contracts with Joseph S. Free in charge, Mr. Pree has been working three shifts of three meach, and as he is the same gentleman who sumt the shaft on the La Cicule, he is enthusiant over the new that as he is confident that it is an extension of the La Cicule ledge, as the mineral is very similar in its characteristics although of higher grade.

Mr. Well, in speaking of the glad news, stated that it was the intention of the company to continue extensive work in the dovelopment of the property, and thus while the body of mineral aready disslosed will be thoroughly explored, another prospecting shaft will be sunk on the group, while in during a main working shaft will be sunk to the deep, the idea being to credit teduction works as soon as the amount of ore blocked out will justify such action on the part of the association.

The discovery of ore in the Kismet means a great deal for the west dip, and the query now is, "when will the stopping point of this gigantic gold-boaring beit be found" as already its permanency and continuity has been proven from the Gray Rooster south of the South Dulsy, it distance of several thousand feet; the vein ranging from seven to thirty feet, all of which carries good milling values and there is great, and so is the west dip.

THE CIRCLE MINING COMPANY.

New Company Formed to Dig For Gold In Lion Hill Country.

Articles of incorporation were pre-ared yesterday and signed for the for-

pared yesterialy and signed for the for-mation of another company, whose pur-pose it is to delve for the yellow metal in the rock-ribbed sides of Lion hill, in Ophir district, a number of the incor-perators being well known in mining circles in this city and elsewhere. The name of the company, according to the papers which are to be filed for record within the next day or two, is the Circle Gold Mining company, the property on which the corporation is based bettur a group of seven claims on Lion hill, which encircle the holdings of the Northern Light company on the resist and nowth. The capitalization of the company has been placed at 20,000 shares of a par-

retary.

This property is believed to be on an accession of the new and rich wein reently underweed in the Northern Light y Superintendent R. G. Leeg, and asis the intention of the company to eight at once the active development f the property, there is good and surclean reason to predict that in the intention bill will be able to bonst of its poss-seion of another producer of ay mineral.

pay mineral.

The company is a strong one, as it includes in the personnel of its efficers some of the best men of this city.

Daisy a Beady Seller-Four Aces

Strong-Northern Light Up.

The week in the mining share market opened up strong and netive on the

The week in the mining share market opened up strong and active on the floor of the exchange, the brokers having well supplied with buying scrient, while a greatly array of securities received recognition during the season, quite a number of advances being chronicles, as well as many transfers. Daly was the first security to post transfers, a board tot of this stock finiting a ready buyer at \$1.02½. Daisy was the next dealer, and was traded in to the extent of 100 shares at 60 cents, the stock being strong at the close at the quotations given below. Geyser-Marion was en the dawn grade, but was not neglected in the way of sales, Galena being active and in great form at 60 cents. Northern Light casted marked advances during the call, the closur figures being 13 cents bid and 60 ashed. Sacramento trapacted some business, but at deciming figures, Mammoth sold at \$2, but was not in active demant.

some luciness. but at deciming figures. Mammoth sold at \$2. but was not in active demand.

The heavy hindness of the session was in the unilated securities, among which there are many favorties, the first to scare in the way of sales being fluckeys, which caused guilt a flurry among the brokers, selling as high as 7 cents. Chieride Point fell off a point or two, and the stock changed hands at \$1.55\text{in}, Dalton being a dealer at 2 cents. Fextor pushed to the front in a manner indicating that the litne had arrived when this stock might take a sport inward, the shares of the company changing hands at \$2.35 before the close tolder Eagle touched H cents in the selling at the opening, shain losses being chronicled before the next stock was called. Golden Cate Extension was traded in, and so was Gold Treasure and Homestaller, the latter posting gains, with sales at 6 vents, the built and bears fought substantial a cent as the call progressed, Joe Bowers Extension making steady advances and selling as high as 11 cents. Little Pittsburg was rather flat, with more sellers to the pit than buyers. Simban mas able to register gains as well

Sacking Gold Ore For Shipment at the Old Delton Mine.

Dr. F. J. Lyon of Marysvale, who is targely interested in Ohio mining district properties, is in the city visiting friends and attending to some business (

tried properties, is in the city visiting friends and attending to some business area. The doctor, in referring to mining matters in that section, stated that excellent progress is being rands in the development of the old Poer Trail mine, being gold ore being exposed in the work. In speaking of the Balton, in the highits above Marrysvale, the doctor stated that two. 25%, inc. In speaking of the Balton, in the north files of Equipment of the doctor stated that above Marrysvale, the doctor stated that the men are sacking some high-grade in flow at the mines of this property. But that if was the intention of Manager O. R. Young, who is now at the mines of pair with the men are sacking some high-grade in for the winter by this time.

Work has been progressing all summer and fall in the exploration of the Aurora, a promising gold property in the district being pretty well snowed in for the winter by this time.

Work has been progressing all summer and fall in the exploration of the Aurora, a promising gold property in the district being pretty well snowed in for the winter by this time.

Work has been progressing all summer and fall in the exploration of the Aurora, a promising gold property in the heary vicinity of the Dalton, but, the last contract being completed, it is sated that work has been discontinued for the winter.

Dr. Lyons is enthusiastic over the coming year, and is sanguine that an-

as considerable dealing. Star Consolidated bolding up well near the \$1.40 of the state; and he is confident that a fiveped at \$1.40 of the state; and he is confident that a number of important enterprises in the mixing line will be fairly numbered and in successful operation within the next few months.

mining the will be fairly nunched and in successful operation within the next few months.

There are many valuable mines and prospects around Maryavale, and, with the pronounced interest with which outside capital regards mining just now, this section is certain to receive recognition and attention, which it so ichly merits.

Ore In the American.

R. C. Taylor, the veteran mining operator, who has been busy for the past three years in the development of the American mine, near the head of the American mine, near the head of the American mine, near the head of the Gottonwood canyon, arrived in the city a day or so ango, clated over the fact that, at lant, his labors had been made that the next for the past few days, left for the fact that, at lant, his labors had been made that the next for the mine last night.

Supt. A. Backbee of the Sensean of the rest than ever the merican mines only the control of the Sensean ways and the city of the past few days, left for the mine last night. Ore In the American.

R. C. Taylor, the veteran mining operator, who has been busy for the past three years in the development of the American milns, near the bead of Big Cottonwood canyon, arrived in the city a day or so ango, clated over the fact that, at last, his labors had been rewarded, as, just before leaving the mine for Salt Lake, the face of this tunnel broke into a fine body of ore, carrying copper, silver and gold, the values of which will run from \$16 to \$20 to the ton.

The ore body was tapped at a considerable depth by a long tunnel, which has been driven into the mountain for a distance of \$27 feet, and it is believed that a large measure of pay mineral will eventually be uncovered, as the extent of the deposit had not been determined at the time Mr. Taylor left for the capital.

Mr. Taylor will leave for the mine after the holidays, and will continue work all winter, with the expectation that the mine will be on a shipping and paying basis by spring.

termined at the time Mr. Taylor left for the capital.

Mr. Taylor will leave for the mine after the holidays, and will continue work all winter, with the expectation that the mine will be on a shipping and paying basis by spring.

Down From Alta.

John Hanford, who is working the Highland Chief mine, at Alta, on a leave with the different work of the state of the sta

John Hantore, who is working the Highland Chief mine, at Alta, on a lease, was in the city yesterday.

Mr. Hanford, who is working three men in the operation of this property, states that there is a most encouraging showing of a good grade of ore exposed in the property, and he is sangulate that another season will see him often in the Salt Lake market with consignments of pay mineral.

According to Mr. Hanford, this has been a prosperous year at Alta, and he says that there has been more activity there this season than for many years past, to prove which he points to the fact that the Grizzley, the Regulator and the Vallejo now have good shipments at the sampler, sent down the past week, while quite a number of men are employed in the mines of the camp, the Grizzley working five, the Regulator four, the City Rocks three, the Albion sive, the Kate Hays two, the Toledo two and the Montenuma three, the latter troperty showing up some fine ore at the present time.

The Tintic Miner Special.

The Tintic Miner Special.

The Tintic Miner Special.

The special edition of the Tintic Miner of Eureka is out, and it is a credit to its publishers, to the people of the great Tintic district and it will doubtless do much towards attracting universal attention from abroad to the people of the different camps embraced in the district the lessue of the mines and prospective bonancas of this favored section, the location of nearly all of which are shown in the fine map which is not the least of the many interesting features of the publication.

This special edition has been well pair made to the many the fourth has returned to Fort Russell to fourth has returned to Fort Russell universal at a leave of a week.

Cox quarters are being aftered up for Major Markley, who will relieve Captain James as post commandar ; in a few days.

This edition, the first time is several weeks and the citizens of that place are recovering from the fright caused by the acts of lawlessness when a drunken disturbance in Cheyonne for several weeks, and the citizens of that place are recovering from the fright caused by the acts of lawlessness when a drunken disturbance in Cheyonne for

transactions and many sales were chronicled before the close of business. Four Aces was one of the favorites on the curb, selling at 46 cents. Northern Light was also in demand and a ready seller, being wanted at 55 cents, and closting firm at this figure. Joe Bowers was wanted at 21% cents, Joe Bowers Extension being firm at the top figure established on the board in the morning, while Buckeye was quoted at 7% cents in the bidding Golden Eagle was in good form and was in demand at 11 cents. Star Consolidated being somewhat buoyant and near board figures. Homestake was a favorite at 7 cents in the Bidding, Dalsy being sought for at 56 cents, while sales of Tankee Consolidated were reported at an advance over former quotations.

The Sumpter Incorporates.

The Sumpter Mining company, with a capital stock of \$500,000, in \$1 shares, a capital stock of \$500,000, in \$1 shares,
was incorporated yesterday to develop
a group of seventeen mining claims
situated in Ophir mining district,
Joseph G. Jacobs is president and
treasurer; John H. Conrad, vice president;
John A. Beokwalter, secretary,
and Charles M. McEntire and Edward
B. Critchlow are the other directors,
Sait Lanke City is to be the company's
principal place of husiness.
